

JAPANESE JOURNAL OF APPLIED PHYSICS EDUCATION

Published by the Division of Applied Physics Education

The Japan Society of Applied Physics

Volume 42, Number 1, 2018

CONTENTS

Research paper

- Development of teaching materials with single-layer anti-reflective coatings
/ Takahiro Motegi and Yuki Aoki 1
- A qualitative study on the attitude to lessons of industry-related specialized subjects
/ Chikara Onodera and Yoshinori Hayakawa 7
- Medium-sized Savonius type wind power generator using a handmade generator
/ Shion Idutsu, Yasufumi Kawamura and Hiroki Ninomiya 13
- Silicon solar cell fabricated without semiconductor manufacturing equipments and hydrofluoric acid aqueous solution
/ Yoshio Yasumori, Takumi Okada and Ilyong Choe 21
- Development of a teaching material and lesson practice to learn the decomposition of gravity acting on an object on a slope / Manami Mori, Akihiko Shishino and Yukio Terashima 27
- Educational effects of manufacturing experience by making solar music box
/ Yoshiaki Yoshida and Naoto Nunomura 33

Practical report

- Practices in a class “Instruction methods for science education” in teacher training course for engineering students / Nobu Kuzuu 43

Note

- Development of polarization color educational tool with uniformed transmittance
/ Toshiki Matsuzaki, Huangyi Qin, Yutaro Shibata and Kenji Harada 49
- Observation of the optical absorption spectrum by use of color filters
/ Kenshiro Kaneshige and Takanori Tsutaoka 53
- Horizontal projectile motion experiments using the acceleration sensor of a smartphone
/ Akira Adachi 57

Opinions

- On the expression of “the current flows” / Yuryo Sakurai 63
